

Work-Driven Design®

TRUCK BODIES THAT ALWAYS DELIVER ON DURABILITY.

Safe, strong, and ready to go to work.

Utilimaster truck bodies are built tough from the road up, setting the highest standard for heavy-duty commercial delivery. Built and assembled across North America with the most durable materials available, from aluminum to Utiliplate sidewalls. Our rugged truck bodies are made for the long haul.

Lasting quality takes you further down the road.

For nearly 50 years, Utilimaster has delivered success to small and large fleets with long-lasting vehicles of all shapes and sizes. Designed, engineered, and purpose-built to get every job done with speed, safety, and efficiency, just like the men and women that drive them.

Meeting demand with more manufacturing capacity.

Utilimaster has a nationwide network of manufacturing facilities, including a brand new 250,000 sq ft truck body facility in Landisville, PA, working around the clock to deliver our rugged truck bodies. You need to meet demand now and we have people and plants around the country to get you up and running with speed, efficiency, and our legendary reliability.
