

Under 10,000 lbs. GVWR

VELOCITY R2

**DRIVING TOWARD  
THE FUTURE.  
WITH MORE VELOCITY  
THAN EVER.**

**Push button  
bulkhead door**

**360° Camera**

**Wider  
Bulkhead Door**

The popular Velocity family of hard-working walk-in vans is growing and moving in a powerful new direction. The Utilimaster Velocity R2 is here, with a GVWR of under 10,000 lbs. so you can avoid costly DOT requirements. Built on the modern Ram Promaster chassis, the R2 gives you the comfort and agility of a cargo van with the cargo space and access of a walk-in van.

**Nimble. Comfortable. Efficient.**

This could be the delivery industry's most efficient and accessible vehicle. Any driver can get behind the wheel, surrounded by advanced ergonomics for comfort, ease and safety. The Velocity R2 provides easy automatic bulkhead access to a spacious cargo area with stand-up headroom and plenty of space to handle custom upfit shelving.

**Easy bulkhead access  
for faster deliveries.**

With the Velocity R2, there's no need to walk outside and open the cargo door. Simply push a button and the high and wide interior bulkhead door opens automatically. So, there's less wear and tear on your driver—allowing them to make more stops, more deliveries, and more impact on your bottom line.

**Safety in every direction.**

The R2 features the latest in premium safety technology to protect the driver, vehicle, and cargo. Our 360° camera offers clear, wide views for backing up, and the four bird's eye cameras keep the driver fully aware of any potential hazard while driving or parking. Rear and front collision detection systems keep pedestrians, vehicles, and surrounding property seen and safe.

**Make a bold statement  
with seamless aesthetics.**

We've eliminated the rivets to give you a perfectly smooth exterior, so your graphics are big, bold, and impactful. It's a large vehicle for your marketing message, which builds business while you're busy making money. Lower body fiberglass cladding also improves durability and is simple and inexpensive to replace if needed.
