

Work-Driven Design®

# COOL CARGO, SWIFT SOLUTION.

## Tailored to drive excellence

A Utilimaster refrigerated truck is more than just a vehicle. It's a highly customizable solution equipped to meet the unique demands of your industry. Crafted with precision through Work-Driven Design®, this vehicle embodies efficiency and reliability to the core. Lightweight panels and smart storage solutions help elevate your fleet's productivity. Top-notch insulation ensures the utmost care for your precious cargo. Its smooth and modern exterior truck body walls provide an ideal canvas for your brand to make a lasting impression.

## Cool the ride

Utilimaster refrigerated truck bodies incorporate polystyrene insulation and fiberglass panels to ensure your products stay fresh. The insulation is optimized at 3" thick on the sides, ceiling and front, and 4" thick on the floor to minimize cooling loss and ensure low thermal conductivity. The durable fiberglass panels resist external temperature shifts and humidity to significantly reduce heat transfer. Repairs to the panels are swift and easy, so your business can stay on the road without missing a beat.

## Key Features

**Refrigerated units:** Thermo King V-520 Max or Carrier 40 XR can be roof or side mounted.

**Insulated body** with two swing back doors for easy unloading of perishable cargo.

**Front wall** reinforcement for durability and strength.

**Food-grade** interior walls help maintain a hygienic environment.

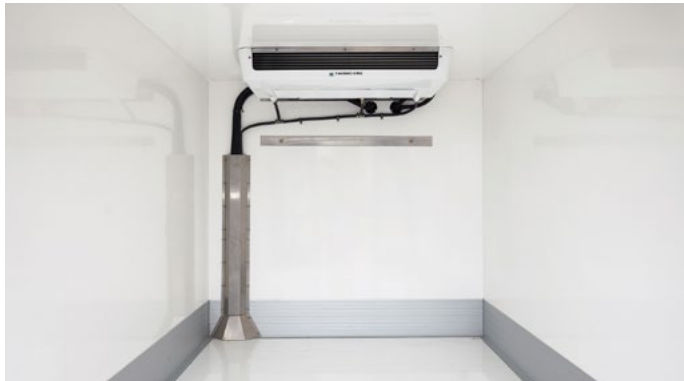

**Peace of Mind.** Utilimaster builds reliable truck bodies, backed by an industry leading warranty.

## Specifications

Refrigerated Body Weight (lbs.)				
Width (in.)	Height (in.)	Length		
		12'	14'	16'
90"	79"	2,325	2,328	2,548
90"	85"	2,361	2,369	2,594
90"	91"	2,403	2,405	2,634
90"	97"	2,433	2,427	2,680
96"	103"	N/A	2,544	2,782

## Features/Options

Thermo King V-520 Max or Carrier 40 XR Refrigeration Unit

Insulated body with two swing back doors

- 10' ramp (for 12' unit) and 12' ramp (for 14-16' units)
